Hadeer Hassan

Software Engineer with an experience in the software industry who is looking forward to share this experience with others as well as add more to it by getting involved in new challenging projects.

WORK EXPERIENCE

Enozom — Software Engineer

September, 2017 - August, 2018

Projects

Pharos University (ECampus) - A University System that integrates all features required by a university , starting from enrolling a new applicant until graduating students. The system deals with students grades , financials and more.

Improved the projects performance and response by converting it from ASP.Net Web forms to Web Api and AngularJS.

https://www.enozom.com/Our_Work/Pharos-University-in-Alexandria

Forsan International Schools - A Multi-Schools System that handles all school processes from enrolling an applicant to dealing with all actions required until a student graduates.

Worked on building pages (both backend and frontend), fixing bugs and producing reports.

Mal3abak - A Php website built for reserving and controlling sport fields. Includes Confirming and Declining reservations , handling academies, teams and more.

Worked on building the front-end of the system using AngularJs.

Other Projects - Davila, Diversity, Alexandria Higher Institute of Engineering & Technology (Ragab) - Worked on debugging and fixing bugs and producing reports using Stimulsoft Reporting Tool.

Q-Vision — *Software Engineer*

July, 2017 - September, 2017

Momtaz express - A transportation system using MVC, javascript and SQL database.

Got the chance to take part in the building of the admin's web pages.
